

World's Finest Products For Harley-Davidsons

Brighten Rocker

Slimline Solo Seat

Here ya go, the thinnest, baddest looking solo seats you're ever going to find for your retro ride! These seats have about 1/2" of padding giving an extremely low profile, and flipped up in the back for support and to keep you from sliding off when you give it the gas! The narrow versions measure 11 1/2" long X 9 1/2" wide while the wide versions measure 13" long X 11 1/2" wide. Constructed with a formed steel base that won't crack like fiberglass bases, and covered with a high quality naugahyde that will last for years! Seats mount to any frame using seat springs and appropriate mounting brackets that are also available in this section of the handbook. Look great when used along with our matching colored grips, kicker pedals, floorboard mats and solo saddlebags!

Thunderbike Flip Handle Bar

Made of 1,25" tubes with 1" grip ends.

683780 Large: 93cm wide, 38cm high

683781 Small: 80cm wide, 30cm high

683782 Large, Springer: 96cm wide, 38cm high

683783 Small, Springer: 80cm wide, 30cm high

Exile Hidden Switch System

These hidden switches are available in two different styles to be built in grips or directly into handlebars. Below pre set grips are available in 3 different styles. Requires a throttle sleeve for installation (not included).

RED System

Sends a momentary pulse when the turn-signal button is pressed and works with HD modules, Badlands, Wire-Plus etc, etc

653269 Hidden switch system red

BLUE System

This system becomes live when the button is pressed and stays live until the GripAce cancels the signal or the button is pressed again. This could be used with a basic flasher unit (automotive type) and is sometimes used if building a bike from ground-up

TAILLIGHT FUNCTION

LED

Blaze LED Turn Signals and Taillights with E-approval

These are cost effective and really nice shaped turn signals/taillights. Available as LED turn signal version or as LED taillight including brake light and turn signal function (no license plate light). The mount is M8 x 1.25 thread with hex nut. Dimensions: Length x width x depth 39.5 x 19.5 x 19 mm, rubber stem length 15 mm. Sold in pairs..

Blaze LED turn signals

- 653321** Black, smoked lens
- 653322** Chrome, clear lens
- 653323** Black, clear lens

Blaze LED taillight with brake light and turn signal function

- 653324** Black, smoked lens
- 653325** Chrome, clear lens
- 653326** Black, clear lens

Note: When using LED turn indicators on vehicles that do not use LED indicators in their stock versions it may be necessary to replace the flasher relay and/or use resistances to reduce the flash frequency to an acceptable level.

Joker

MACHINE

Joker Classic Fork Mount Turn Signal/Marker Lights.

We upgraded our fork mount turn signal/marker lights with a super bright LED pod for more visibility. We also added a 49 mm fork tube version to our line for Dyna's and V-Rod's.

- **IMPORTANT:** If being used as a turn signal a load equalizer is required.
- Made from T6-6061 billet aluminum, then polished and chrome plated or black anodized.
- Comes with AMBER LED pod lights.
- LED pod lights are angled 25 degrees to accommodate the rake of the forks.
- Available for 39 mm, 41 mm, and our NEW 49 mm fork tubes.
- Sold in pairs.

Performance Machine FASTair Intake Solution

PM's new FASTair Intake utilizes K&N filter element allowing a good HP plus on a stock Harley Davidson. Not only does this intake solution make horsepower but it's the most innovative and aggressive looking air cleaner on the market. PM also added their proven internal crankcase breather system. Once again PM has created a truly innovate and unique piece to take your bike to the next level. Available in chrome and Contrast Cut and include a rain sock to protect your air filter from the elements.

- 653258** For 93-11 TWIN CAM & EVO models, contrast cut
- 653259** For 93-11 TWIN CAM & EVO models, chrome
- 653260** For 08-11 FL throttle by wire models, contrast cut

Velva Ride Vibration Control System by V-Thunder

Reduces transmitted engine vibration by up to 50% and provides the comfort needed for all-day rides.

Velva Ride Engine Stabilizers

Stainless steel body contains a stainless steel plunger encased in specially-formulated urethane that significantly outperforms stock stabilizers. When installed on rubber mount models, the engine is completely isolated from the frame by eliminating all metal-to-metal contact. Complete with rod ends and available with a plain finish or polished bodies and rod ends. For all rubber-mounted 5-speed models 80-11, and all Buell models 91-02. Replaces OEM 16219-79A.

Sold in Pairs

812 Series Vintage Shocks by Progressive Suspension

PSI has utilized a multi-stage, velocity sensitive shock and wrapped it in an old school full chrome steel can that looks like it'd be right at home on a 50's Panhead. In fact, it would also look great on a modern Dyna and it'll make any of them ride better. Hidden hardware, billet aluminum end caps, with a five position preload adjuster make for a stylish as well as high performance shock.

Dyna Models

680081 11" Chrome, Fits 91-11

Sportster Models

680105 11" Chrome, Fits all 91-03

680114 11" Chrome, Fits all 04-11

Optional 812 Shock Lights

Designed to bolt onto the PSI 812 and 412 Series shocks, the Shock Lights can be wired into brake or turn signal systems. Chromed aluminum caps features hidden hardware and an integrated LED that blends nicely into the cap until the super bright LED's are activated. Kit includes load balancer, two Shocks Lights and required hardware.

680047 Fits 812 & 412 Series shocks for FLH/FLT and XL models

680083 Fits 812 & 412 Series shocks for FXD & FXDWG models

812 Series Flame Cut Shocks by Progressive Suspension

In 2008 Progressive Suspension has kicked it up another notch with the 812 FLAME Series Shocks. We've taken our road-proven multi-stage velocity sensitive damper system and five position preload adjuster and combined it with flowing machined aluminum end caps and a water jet cut flamed spring cans. The result is a shock that changes the look of shocks as we know them without sacrificing the performance that we demand.

motogadget

M-Can Adapter a World Novelty from Motogadget!

M-Can - the adaptor for trouble-free installation of instruments directly at the OBD interface. With help of a tiny box the installation of sensors for speed or tach becomes superfluous. Every Harley Davidson from 04 on has an OBD interface (ON Board Diagnosis) in form of a 3-pole plug connector on the bike. With the digital adaptor M-Can which is simply plugged into this connector, instruments of the Motoscope series are linked directly to the digital data bus of the motorcycle. The installation and connection of sensors for speed and tach is not necessary anymore. Now this data is read directly from the diagnostic interface. The power supply of the instruments is also fed by the OBD interface. With this adaptor it's possible to connect a 'motoscope mini' without any other connection work on the motorcycle. Also the signal for the MIL (Malfunction Indicator Light) for trouble codes from engine and periphery can be indicated by connection of a LED / warning lamp. A complete exchange of the original instruments is possible and also customizing of the latest models is an option without reducing operational safety. The M-Can is only a tiny, fully molded box, an OBD plug and a long connecting lead to the instrument. It is resistant to vibrations and water. Operation is guaranteed up to under 5 V of on-board voltage and therefore corresponds to all SAE specifications for motorcycles. Not for CAN-Bus models.

696287 M-Can Adapter

Oil Pressure Sender Covers by Kuryakyn

The stock oil pressure switch is so plain looking it's conspicuous. The simple addition of this finely sculpted chrome Oil Pressure Sender Cover adds life to the dull cast finish surrounding it.

605210 Sender cover for 99-06 Touring models

605212 Sender cover for all 99-12 Twin cams except 99-06 Touring

Motoscope Mini

motogadget

The Motoscope mini from Motogadget features a multifunctional digital instrument, which is extremely compact and lightweight. The LED display is a proprietary development by Motogadget especially designed for the Motoscope mini. This display represents an absolute novelty in the field of digital instruments. 251 ultra-bright LEDs form an almost rimless display area that provides for faultless readable indications and different modes of programming. Due to its unostentatious and elegant design and its superb visual and function-related quality the Motoscope mini is eminently suited to almost all two or four wheel custom vehicles - whether they are fighters, low riders, sports bikes, enduros, super motos or even quads, mini-Bikes, scooters and custom cars. The Motoscope mini can be either positioned prominently to enhance a vehicle's style or can be integrated unobtrusively for an absolutely clean look! And finally for all weight fetishists: a bicycle speedometer can hardly beat a weight of 32 grams including connection cable. The Motoscope mini comes including manual, sensor, mini push button, plug kit and 2 screws. With ABE.
