XL883N
SPORTSTER IRON 883 2017

WHAT'S --- BOAR?

Since 2009, Custom Chrome Europe has inspired the scene with a new slogan: „Bolt On and Ride“. While neither „Bolt On“ nor „Ride“ are new themes in a long established and creative customizing scene, the CCE team has successfully combined both themes into now annually built custom bikes which are based on existing motorcycle models that are modified with the latest and best parts available from the worldwide aftermarket. „Bolt On“ stands for easy to mount custom parts, some to be installed by the owner or garage customizers, others, more sophisticated parts, by professional CCE partners, custom shops or authorized Harley-dealers – but it never stopped the individual builder from further individualization, be it by color, surface finish treatment, engravings or what ever creative ideas come to mind. And the “Ride” part? This not just for pleasure, but assures the CCE team that these parts will work under rough and sometimes extreme conditions when the CCE team is “On the Road” to events all over Europe. But yes, the “Ride” part is also fun ...

H⁹ SPORTY

The CCE team picked a very special candidate for building the first Swiss „Bolt On and Ride“ bike: Danny Schneider of HardNine Choppers. Danny is known for riding his bikes the hard way – as he had proven during his Freestyle Moto Cross career and continued during his subsequent passion with customizing „American Iron“. His cross-over bikes combine traditional custom styles with BMX bicycles trends and Freestyle Moto Cross elements, often using authentic antique engines. The „base“ for the project, a 2017 Harley-Davidson 883 „Iron“ was acquired from Baechli Harley-Heaven in Dietikon, Switzerland’s biggest HD dealer - and most active in customizing. The sudden „revival“ in American Dirt Track racing starting in spring 2017 with the renewed „rivalry“ between Indian and Harley-Davidson has sparked new interest in the already popular „Dirt Track“ and „Scrambler“ styled motorcycles – and the Harley-Davidson XL „Sportster“ models. More than just a touch of „Dirt Track/Super Moto“ style is also added by the components used in the creation of this fabulous riding machine.
