Café Racer Tail Section by Burly

The Sportster based Café Racer has become a style of its own, taking the classic look to new levels and doing it with a magic only a Harley can bring to the table. Yet, there's one key part that has been conspicuously absent and that's an authentic Café tail section. Not any more, as Burly Brand has crafted a unique seat/cowl designed to bolt right to your 86-03 Sportster. Available in partially covered with paintable black gel coat as well as a full covered version. Requires removal of fender, supporting struts and relocation of taillight and signals. Includes mounting hardware for OEM electronics.

Beringer Aerotec Brake and Hydraulic Clutch Master Cylinders

These items are very compact and light (270g). Fully machined from billet aluminum using a three ball bearing system and covered by the AEROTEC world-wide patents, they bring exceptional feeling. Adjustable lever distance. Available in polished or black versions with Beringer logo on the master cylinder, lever and handlebar clamp you can choose between 2-finger-use short lever (lever 2) and full-hand long lever (lever 4). The clamps are standard without mirror brackets, clamps with mirror bracket are sold separately. Beringer recommends the use of DOT 4 brake fluid.

Grips by Biltwell

Biltwell grips are molded with soft Krayton rubber for maximum comfort—the same shock-absorbing material found on high-performance motocross grips. Available in 1-inch and four colors.

- Injection-molded Krayton rubber construction
- Soft Krayton rubber absorbs shock and damping vibration
- Aftermarket throttle tube like Biltwell Whiskey throttle required for installation when using stock H-D controls

Biltwell Whiskey Throttle Assembly

The Biltwell Whiskey throttle is constructed of CNC-machined 6061 T-6 aluminum and fits all 1-inch O.D. handlebars. Two sets of four different cable ferrules are included with each full assembly. These plated steel ferrules fit both threaded and click-in barrel ends on stock Harley cables. If you don't run stock H-D cables on your motorcycle, the ferrules provide plenty of options for custom single- or double-cable assembly.

S&S Cycle Sportster 883-1200 Cylinder & Piston Conversion Kit

Riders with 883cc engines can satisfy piston envy quickly and easily with the 883-1200 cylinder and piston conversion kit. Boost any 883cc Harley-Davidson Sportster to 1200cc with no machining or rebalancing your stock 883cc flywheels because of the pistons weights are the same as stock 883 pistons. Cylinder head modification is also not needed. The dished piston dome keeps compression down to a streetable 9.4:1 with stock 883cc heads. Installing this kit takes the same time as replacing a stock top end. It's just more fun when you're done. Fits 86-15 883cc Sportster models!

601365 Cylinder Kit, black 3-1/2" Bore, 4.650" x 3-13/16" Stroke

Performance Fork Springs by Progressive Suspension

Progressively-wound springs are made using the finest spring material with a Manufacturer's Lifetime Warranty. They eliminate sag, reduce nose dive under braking, improve stability and increase ride comfort.

Fork Lowering Kits

An easy and inexpensive way to drop the front end of your bike one or two inches. Includes progressively-wound fork springs, spacers, and lowering components.

28541 Fits 39 mm Showa forks on FXR models 87-94, XL models 87-03, FXDX 99, Dyna models (except FXDWG) 87-00. Note: Careful evaluation of fender-to-frame clearance is required when installing any lowering kit.

CATALOG "EDITION 45" PAGE 15.35

ADVANCED SUSPENSION TECHNOLOGY

S36 Twin Shock

For bikes with twin dampers Öhlins developed the S36 twin shocks. As with all Öhlins shock absorbers these are specifically built and designed for each model in the Öhlins application list. The dampers are of emulsion or monotube design with or without length adjuster and two way adjustable. The Piston Diameter of this S36 Twin Shock absorber is 36 mm. The shock absorber is developed and suitable as a great upgrade to bikes running twin dampers. The S36 Twin shock comes in different configurations depending on the bike model it was designed for.

S36PL

Monotube high pressure gas type shock absorber with external "piggy back" reservoir. The length of this shock absorber is adjustable. Adjustable spring preload.
