Sportster Mid Controls

- Moves foot position approximately 1" up, 1" back and 1.5" narrower per side (compared to stock mid controls) for increased ground clearance when cornering
- Utilizes OEM rear master cylinder and shift lever
- Eliminates bulky, heavy OEM cast steel foot peg brackets, bell crank brake rod and master cylinder bracket
- 2014-16 does not include brake reservoir bracket, not needed
- Passenger Pegs & Mount sold separately
- Relocates stock master cylinder

Performance Machine 4 Piston Calipers

PM has created a new 4 piston billet aluminum caliper specifically engineered for 08-09 HD FL models as well as 06-09 HD VRSC models utilizing the stock brake master cylinder. These HD models utilize a smaller 15mm piston in the brake master cylinder which requires the use of a smaller volume caliper. This PM 4 piston caliper uses PM's proven caliper design standards to optimize the braking performance on these specific HD models. Customers who opt for the PM 4 or 6 piston differential bore calipers must upgrade to an 11/16" brake master cylinder for optimal performance. PM does not recommend using the stock HD 15mm brake master cylinder with the PM 4 or 6 piston differential bore calipers.

Left side caliper

684267 For 300 mm brake rotors, contrast cut, no Approval

970 Series Piggyback Performance Shocks by Progressive Suspension

Inspired by racers, riders and those who demand more of their bikes than weekend coffee runs or a leisurely putt around town. The 970 series shocks are built in the USA and combine a high-pressure gas mono-tube design with progressive rate springs, deflective disc-valving routed through two unique circuits. The threaded pre-load adjustment and external compression adjustment knob allow for fine tuning to provide optimum performance for every riders size and riding style.

Fits 91-17 FXD/FXDWG models
